

For Immediate Release

**DAHLE'S OFFERS LASER ATTACHEMENT FOR
PREMIUM SERIES LARGE FORMAT GUILLOTINES**

Peterborough, NH, October 1, 2008 –

To the left of the line or to the right of it? When extreme accuracy is needed, Dahle's new laser guide will help you cut right down the middle each and every time. Lining up your work has never been easier or more convenient. The laser produces a thin red line that illuminates the entire cutting line and guarantees you're cutting exactly where you expect.

"Laser guides have been offered on power tools for years," said Andy Milkey, National Sales Manager for Dahle North America, Inc. "It's convenient, and the most accurate way to know exactly where you are going to cut."

Dahle's 797 laser can be purchased with a "21 Series" Premium Large Format Guillotine or as an accessory to one already owned. As an accessory, it quickly mounts to the cutter in only a few minutes and is easy to calibrate. Detailed instructions are included and available online. The 797 laser retails for \$180 and if purchased with a Premium Series Large Format Guillotine includes professional installation

Dahle North America, Inc. is a fully integrated manufacturer and distributor of professional cutting tools, paper shredders, and office products with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper cutters and trimmers, scissors, pencil sharpeners, and cutting mats for professionals and home use.
