**Dahle Introduces An Intuitive Data Destruction Solution:
*The Need for Jam-Proof Data Destruction, Results in the World's Most Intelligent Shredder***

Peterborough, NH, February 6, 2012 –

Dahle introduces the World's only shredder equipped with the revolutionary ESP technology (Electronic Sensing Protection). Each DAHLE CleanTEC[®] shredder "Knows" how much paper you're trying to shred and won't allow sheet capacity to be exceeded. The command dial illuminates green when shredding under capacity, yellow when getting close to capacity, and red when capacity is exceeded. When illuminated red, the shredder will not operate until paper is removed and proper sheet capacity is met. This feature not only eliminates the guesswork of how much the machine will shred, it also saves time and frustration caused by a potential overfeed.

Dahle shredders feature solid cutting cylinders milled from a block of German steel. They're perfectly aligned in an all-steel frame and guaranteed for life. The result is a machine with strength, power, and the ability to handle all of your document destruction needs.

"For over 80 years, Dahle has established a reputation for developing innovative products," said Scott Propkop, VP, Dahle North America, Inc. "We are pleased to offer the most advanced shredder ever created."

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision.
