Dahle Introduces Revolutionary Safety Features: *Putting Safety 1st Result in the World's Most Advanced Shredder*

Peterborough, NH, February 21, 2012 –

DAHLE CleanTEC[®] shredders offer the most advanced safety features in the industry. The revolutionary Verbal and Contact Emergency Shut-down allows the user to simply say “Stop” or tap the top cover of the machine, and the shredder immediately stops. Each machine has a steel reinforced feed opening that’s only large enough to accept paper. As an added safeguard, this opening contains electronic sensors that will turn the shredder off, should your fingers get too close. An emergency shutoff switch is also located on the back of the machine as yet another level of personal safety.

Dahle shredders feature solid cutting cylinders milled from a block of German steel. They’re perfectly aligned in an all-steel frame and guaranteed for life. The result is a machine with strength, power, and the ability to handle all of your document destruction needs.

“Dahle has always put safety first,” said Scott Prokop, VP, Dahle North America, Inc. “Customers can rest assured knowing their machine has the most advanced safety features on the market.”

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, paper cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
