

For Immediate Release

Novus B56 Heavy Duty Stapler: Power and Performance for Larger Applications

Peterborough, NH, January 9, 2017– Novus Dahle GmbH & Co., a world leader in staplers and punches, announces a new design for the Novus B56 Heavy Duty Stapler. Novus Staplers are the preferred choice among professionals throughout the world. These Heavy Duty clinchers are capable of continually stapling large quantities of paper with minimal effort. Designed and developed in Germany, they will exceed expectations and improve efficiency in the workplace.

The Novus B56 is German engineered and features an automatic bypass system that provides the convenience of using larger staples on smaller projects. A sliding adjustable depth guide allows you to set the staple location and ensure you hit the mark on every document.

The B56 also features an innovative Anti-Blocking System (ABS). This prevents the possibility of a jam and wrestling with your documents once they are stuck to the stapler. A dual staple guide further ensures trouble free performance by providing even pressure on the staple legs until they clinch your documents.

“The Novus B56 is a high capacity workhorse,” said Christopher Jackson, Marketing Manager at Dahle North America, Inc. “Stapling up to 210 sheets of paper is easy to, with very little effort.”

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
