Dahle Integrates An Internal Oiling System Into Shredder Solutions: Removes Guesswork from Shredder Lubrication, Resulting in Peak Performance

Peterborough, NH, February 14, 2012 –

Dahle introduces the World's only shredder equipped with the Dahle EvenFlow Lubricator. This internal automatic oiler provides slow, continuous lubrication across the entire cutting mechanism and ensures peak shredder performance. The Dahle EvenFlow Lubricator is the perfect solution and effectively eliminates the guesswork of “Who”, “How Much”, and “How Often” a shredder will be oiled. These “intelligent” machines also include a “low oil” warning light. All of these features come standard on all DAHLE CleanTEC[®] models.

Dahle shredders feature solid cutting cylinders milled from a block of German steel. They're perfectly aligned in an all-steel frame and guaranteed for life. The result is a machine with strength, power, and the ability to handle all of your document destruction needs.

“Dahle has always focused on customer satisfaction,” said Scott Prokop, VP, Dahle North America, Inc. “We are proud to offer an internal automatic oiling system ensuring peak performance in each of our DAHLE CleanTEC[®] shredders.”

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, paper cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
