

For Immediate Release

## **Dahle North America Offers Laser Guided Stack Cutters** *Designed for Accuracy and Safety*

*Peterborough, NH, January 1, 2007 –*

Dahle's developed a line of Stack Cutters that can produce a clean, burr free factory edge appearance on up to 700 sheets of paper at a time. This line of Premium Stack Cutters features a laser cutting guide and Dahle's exclusive Automatic Cutting System. These features provide an extremely accurate single step operation to clamp and cut through paper with the downward movement of the cutting handle.

“With laser guided accuracy and the Automatic Cutting System,” said Chris Jackson, Marketing Manager, Dahle North America, Inc. “These Stack Cutters are the most advanced manual paper cutters on the market today.”

Dahle Premium Stack Cutters give you the precision you need along with the safety you deserve. Each cutter has built in safety features that will increase the efficiency of your tasks as well as provide a safe and pleasurable cutting experience. The ergonomically correct cutting handle will not move until both acrylic safety shields are in the down position. This prevents your hands from being in the wrong place and eliminates the chance of personal injury.

Two models of Premium Stack Cutters are available. Model 852 has 200 sheet cutting capacity and model 858 can cut through 700 sheets of paper. These cutters are priced at \$2,000 and \$4,000 respectively and can be mounted on the optional floor stands. Dahle Premium Stack Cutters are manufactured in Germany and can be found in art departments, custom frame shops, and print & copy centers throughout the world.

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, paper cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
